Quality Assurance & Quality Systems
GMP, GLP & GCP Environments
Document Control | Deviation Management Support
Change Control Support
Audit Readiness | Regulatory Compliance
SOP Management & Compliance
Process Improvement | Data Review & Analysis
Cross-Functional Collaboration | Laboratory Operations
Continuous Improvement
Google Suite | Microsoft Office
EMR | LIMS | English and Spanish fluency

Work Experience

Pace Life Sciences, Lebanon, NJ - 2025- Present

Quality Assurance Specialist

- Support quality systems and compliance activities within a GMP-regulated laboratory environment.
- Reviewed, edited, and maintained Standard Operating Procedures (SOPs) to ensure compliance with GMP requirements, regulatory standards, and internal quality systems.
- Perform quality review of laboratory documentation, data packages, and records to ensure compliance with internal procedures and regulatory requirements.

- Manage document control activities, including issuance, tracking, revision, and archival of controlled documents.
- Support deviation investigations, CAPA activities, and quality record management.
- Collaborate with laboratory, technical, and operational teams to ensure compliance and improve workflow efficiency.
- Assist in maintaining audit readiness through accurate organization and maintenance of quality documentation.
- Participate in continuous improvement initiatives focused on operational effectiveness, quality performance, and compliance.

Bioreference Laboratories, Elmwood Park, NJ - 2023 - 2025

Medical Laboratory Technologist - 2024-2025

- Perform clinical diagnostic tests with strict adherence to SOPs and quality control protocol.
- Support regulatory compliance through detailed documentation and internal QA initiatives.
- Performing equipment maintenance and troubleshooting to ensure accurate and reliable test results.
- Collaborating with healthcare professionals to interpret test results and provide clinical support.
- Adhering to laboratory safety protocols and infection control procedures.

Medical laboratory Technician - 2023-2024

- Performed routine clinical laboratory testing and specimen processing in accordance with established procedures.
- Maintained accurate laboratory records and documentation to support compliance and quality standards.
- Assisted with quality control activities and daily laboratory operations.
- Supported workflow management in a fast-paced diagnostic testing environment.
- Ensured compliance with laboratory safety, infection control, and regulatory requirements.
